

VISITORS

Remigio Baca (circa 2002)

The _____ mountains
to the place of San Anton.
There's things flying through the air
we don't even know.
Some say visitors from space have come
to contact you and me.
I say, we're better off
if you're their contactee.

One early summer afternoon
as we were going by,
we saw this flying disc
that fell out of the sky.
It was _____ up and down,
dropping pieces of trash.
We thought it was inevitable
that it was going to crash.

It crashed into the gully.
a short ways from the county seat.
These were the strangest creatures
we would ever meet.

The military came and told us
we had to forget real soon
that we had just witnessed the crash
of a weather air balloon.

We've taken wooden nickles, and _____ bridges too.
There were pieces of material,
and I'm not telling you,
You'd roll it up and it jumps back
into its original form.
We took a little of this and that
and ran all the way home.

Well, we've taken wooden nickles, but a lot of bridges too,
I'm here to tell you, Mr. Military,
we're incensed with you.
About the material from the site
to you we don't want to talk.
At 10:00 AM on Saturday morning
it goes on the auction block.

There's foreign dignitaries
and companies that will bid.
We've arranged for you to tell them
all you know and did.
They say it's more unusual
than materials from the moon.
After all, this is just trash
from an old weather air balloon
After all this is just trash
from an old weather air balloon.
